

In the Specification:

Please replace the paragraph at page 6, lines 25 and 26 of the specification with the following new paragraph:

61 In Figure 7, the integral guide 15 has two non-parallel portions, 15A, 15B the angle A between portions 15A, 15B being 90°.

Please replace the paragraph at page 7, lines 12-18 of the specification with the following new paragraph:

62 The angle A subtended by the guide 1 in Figure 7 need not necessarily be 90° and could, for example, be selected from the group comprising 60°, 45°, 90° and/or 120°. Furthermore, these angles could also apply to the grooves 14 illustrated in Figure 5. This enables a non-integral pair of guides 1 to achieve the same end result as the integral guide generally referenced 15 having two elongate portions 16A, 16B at right angles to each or the end illustrated in Figure 7, *i.e.*, that of a fixed angle.
